

Louisiana AGC's Supervisory Training Program

UNIT 6: UNDERSTANDING AND MANAGING PROJECT COSTS!

Supervisory skill—or the lack of it—directly affects every company's bottom line. Each day decisions made by every foreman and superintendent are crucial to the success or failure of every construction project. You make your money in the field. Or you lose it.

The Supervisory Training Program (STP) developed by AGC, is designed specifically to meet the needs of the construction industry. Developed, updated, and field-tested by and for contractors, the Program consists of 12 courses that focus on the knowledge and skills that every supervisor must have to be an effective manager of people, time, equipment and materials.

UNIT 6- Understanding and Managing Project Costs! -----REGISTRATION FORM-----

This course covers understanding the pre-construction process and how project estimates are compiled, how to compare actual project costs with those estimated, and how to control costs to meet the estimate. Unit 6 explores:

Introduction to understanding & managing project costs
Who controls project costs
Planning for cost control
Labor cost variances
Working with project partners

Construction estimates
Reporting and analyzing actual cost
Cost control strategies
Managing risk and loss potentials
Post-project evaluations
